

## Highlights :

**Learn the research and publication trends from ELSEVIER to understand the ISI-listed-journals publications.**

Industrial Doctorate program is specially designed for the working people to convert their monographs, publications, ideas or any other technical findings into academic thesis. In these accelerated, educational and industrial programs, mastering in the respective field are what expected from the learners as to fulfill their credit hours for awards. With the usefulness of ICT, we bring out the best from adult-learners through their prior knowledge or experience and also from their present undertaking regardless of sectors. We bridge both the academia and the industry for knowledge exchange, of course, in the mean of academic degrees. Our academicians will also involve in the discussions through e-Class Room platform to provide detailed guidance.

# Doctor of Philosophy (Industrial-Doctorate)
